## 1 Introduction

Mindbreeze AI extends the Fabasoft Cloud with “Artificial Intelligence” (hereinafter referred to as “AI”). Mindbreeze AI can only be used together with the Fabasoft Cloud and a Fabasoft Solution.

## 2 User Agreement

The following general conditions apply to the use of Mindbreeze AI.

### Volume Packages (pkg)

Volume packages are required to use the AI functionality of Mindbreeze AI. The volume consumed is determined on the basis of the cumulative calls per year and the number of indexed objects.

A call comprises a request from a user or a service and the corresponding response from the Mindbreeze AI service called. If a call triggers further sub-calls, these are also counted as independent calls.

### Dependence on Data and Context

The information, texts, analyses or recommendations generated by the AI are based on underlying data, whereby completeness, timeliness and accuracy cannot be guaranteed. The quality and informative value of the AI output depends largely on the context and the formulation of the input (prompts).

### No Guarantee for Accuracy or Suitability

No guarantee is given that the content provided by the AI is correct, complete, up-to-date or suitable for a specific purpose. The use of AI output is at the user's own risk.

### Restriction

Since documents of an encrypted Teamroom can only be decrypted at the workstation, AI functionality is not available for these documents.

## 3 Scope of Services – Base Functionality

The Fabasoft Cloud provides the following use cases with the help of Mindbreeze AI.

Use Case	Description
Asking questions about Teamrooms, files or documents	Questions about the content of Teamrooms, files or documents can be asked in natural language and are answered in natural language based on the context.
Classifying documents	Information can be extracted from documents and taken over as metadata.

## 4 Scope of Services – Interfaces

Mindbreeze AI offers the following interfaces for solutions based on the Fabasoft Cloud.

Interface	Description
Classification	Automated categorization of content (text, images, videos).
Extraction of facts	Identification and extraction of metadata or entities from structured, semi-structured or unstructured content.
Natural language search queries (NLQ)	Processing of search queries in natural language.
Retrieval Augmented Generation (RAG)	Combination of document search (retrieval) and generative AI to create context-related answers (generation).
360-degree views	Analysis and visual presentation of information.
Interactive Exploded Views	Dynamic visualization of complex relationships (e.g. visual preview of exploded views/business documents).
Generative AI	Automated content creation based on existing data.

## 5 Fabasoft Cloud

Mindbreeze AI extends the Fabasoft Cloud with AI functionality. Therefore, in addition to this software product information, the “Fabasoft Cloud” software product information, which describes the basic functionality, also applies to the use of Mindbreeze AI (see <https://www.fabasoft.com/spi>).

## 6 Technical Information

Information about system requirements and supported platforms can be found in the “Technical Information” document (see <https://www.fabasoft.com/spi>).
