1 About Mindbreeze

Mindbreeze with its headquarters in Linz, Austria, is a leading provider of software products that find relevant information throughout the company and the internet quickly and intuitively. The performance of the Mindbreeze products has generated keen interest on an international scale. Mindbreeze GmbH is a subsidiary of Fabasoft AG.

www.mindbreeze.com

Daniel Fallmann studied computer science. At the tender age of 23 he founded Mindbreeze GmbH, an internationally leading provider of software products for enterprise search, search applications and search-based cloud services. Daniel has many years of experience in the computer and information technology sector. He is Mindbreeze GmbH managing director.

For as long as he can remember, Daniel Fallmann has been a science fiction fan. Even then he was fascinated that computers could understand information and correlations.

“This enthusiasm is still as strong as ever”, according to the founder and CEO of the Austrian enterprise search specialists Mindbreeze

2 Mindbreeze InSpire

The future of a company depends on how it utilises its information. Mindbreeze InSpire offers a quick and extensive search through all your company's data sources. Shine a light on all your data with the power of semantic search. Mindbreeze InSpire is delivered as a pre-installed Enterprise Search Appliance Box. Put the server box into the rack. Configure data sources. Start information crawling. And tomorrow information will turn into inspiration for your enterprise. Mindbreeze InSpire update the search index for new and updated information quickly. The time interval can be configured for updating the index every 10 minutes. Mindbreeze InSpire captures all structured and unstructured information in an enterprise including all content repositories, web portals, websites, blogs and social media channels in one semantic search. With Mindbreeze InSpire users find all relevant and associated information. It also creates semantic correlations and uses these to generate dynamic navigation for the users.

Access on mobile devices. Anytime, anywhere.

Mindbreeze InSpire gives you access to all the business facts in the semantic search index on mobile devices. File Services, DMS, legacy applications, SAP, Websites. Whatever you search, you'll find it on your Tablet or Smartphone. Securely and reliably. The Mindbreeze InSpire preview builds the content of search hit out of the search index data. Thereby, all search hits can be viewed on mobile devices, even if the appropriate application is not available. This allows to read Microsoft Outlook emails on Apple iPhones, for instance, without having a Microsoft mail client.

Mindbreeze InSpire at a glance

- Search based business application
- Intuitive and user friendly
- Captures all structured and unstructured information in one semantic search
- Securely and reliably (existing access rights are maintained)
- Pinpoint results with in a split of seconds
- Information access via mobile devices
- Information Pairing Technology
- Connectors for many systems

Example for Information Pairing

feedback

3 References Mindbreeze InSpire

3.1 Treibacher Industrie AG

"At Treibacher we take care to avoid long training periods for our staff when introducing new software. With Mindbreeze InSpire we found a solution that could be introduced within a very short time and required no special staff training. The benefits of the easily operated complete package, and especially the search results, had us convinced right from the start." - Roman Piskernik

3.2 Hochleitner Legal Chambers

"The extensive and personal counseling services provided to our clients call for fast access to caserelated records, as well as to records or the status of revisions in other locations. Our office stays abreast of the modern world of communication; electronic file and information management now enhance more efficient processes." - Dr. Johannes Hochleitner

3.3 Umdasch Group

"By using Mindbreeze InSpire in our company, our workforce has the possibility to find the relevant information from the connected data sources at a glance. The user interface is easy and intuitive to use without any long-term training. After going live all our employees worked immediately with Mindbreeze." - Axel Wieland

4 Other Products

4.1 Mindbreeze InSite

Mindbreeze InSite is easy to integrate since only the pre-defined embed code for the search field and the creation of the index needs to be integrated. New content is automatically added to the index and is instantly available as a search result. Semantic search queries and relevance models deliver “intelligent” results. Preview thumbnails visualize the results and ensure a quick overview. Besides the search functionality, “Information Pairing” technology, developed by Mindbreeze, enables website content editors to integrate dynamic content on pages or sections.

Based on search results, information from different areas is optimally linked and displayed as a newsflash, for example. These newsflashes are updated automatically to produce “live” content. The results are displayed directly on the website and not as with conventional search queries. The search is designed as a cloud service and is ready-for use within a few minutes. A free test version is available under: insite.mindbreeze.com

4.3 Technology news portal futurezone.at (www.futurezone.at)

The screenshot shows the futurezone.at website interface. At the top, there is a search bar containing 'Cloud Computing' and a 'powered by Mindbreeze' logo. Below the search bar, there are navigation tabs for 'Alles', 'Netropolitik', 'B2B', 'Produkte', 'Digital Life', 'Future', 'Meinung', and 'English'. The main content area displays search results for 'Cloud Computing', showing a list of articles with their titles, authors, and dates. A 'Datum' table on the right side of the results shows the number of articles for each year: 2011 (60), 2012 (19), and 2010 (11).

Datum	Count
2011	60
2012	19
2010	11
