

PRESS RELEASE

## Control 2025: AI-Supported Quality Management in Practice

Fabasoft Approve presents the advantages of AI in FMEA, 8D and test plan creation

Linz, April 9, 2025 – **At the industry's leading international trade fair for quality assurance, European software provider Fabasoft Approve will be demonstrating how companies are taking their quality management to a new level by digitalizing cross-company end-to-end processes and using AI.**

The team of experts from Fabasoft Approve will be presenting the AI-supported document and quality management system for industry with the help of live demos from May 6 to 9, 2025. Best practices from reference customers and use cases from the manufacturing industry, such as an AI-supported 8D process, FMEA or smart audit management, will demonstrate the various application possibilities as a holistic computer-aided quality system.

### **Presentation: “Practical examples of the use of AI in quality management”**

On May 6, 2025, Andreas Dangl, Managing Director of Fabasoft Approve GmbH, will be giving a presentation on the topic “Practical examples of the use of AI in quality management” at 12:40 p.m. in the exhibitor forum (Hall 7, Stand 7115). Interested parties will learn how AI supports everyday work and what possibilities a holistic CAQ system with integrated DMS opens up for cross-company quality processes.

### **AI-supported FMEA for innovative quality management**

Approve's integrated AI greatly reduces the manual effort involved in project work. The AI categorizes technical documents automatically, analyzes and extracts information from them, and links them intelligently to create a 360-degree view. AI is also used in the area of FMEA (Failure Mode and Effects Analysis). During the functional analysis, e.g., it generates suggestions for initial malfunctions. It thus supports the FMEA team in context-sensitive brainstorming.

### **The “Approve Quality Race” at the trade fair stand**

At the trade fair stand (Hall 5, Stand 5222), visitors will have the opportunity to take a break with a cup of coffee from the award-winning barista and to prove their own skill in the “Approve Quality Race”.

### **About Fabasoft Approve**

Die Fabasoft Approve GmbH ist ein europäischer Hersteller von Dokumenten- und Qualitätsmanagementsoftware (DMS/QMS) für die Industrie. Dank der einfachen Anpassbarkeit via No-Code/Low-Code lassen sich kundenspezifische Anforderungen innerhalb kürzester Zeit umsetzen. Unternehmensübergreifende Prozesse vernetzen interne und externe Projektpartner auf

einer gemeinsamen Plattform und bilden gestützt durch KI den gesamten Informationslebenszyklus rund um industrielle Erzeugnisse digital ab. Zahlreiche international tätige Großunternehmen aus dem Maschinen- und Anlagenbau vertrauen auf das cloudbasierte Produkt Fabasoft Approve als gemeinsame Datenumgebung in ihrer Digitalisierungsstrategie. Die Fabasoft Approve GmbH ist Teil der Fabasoft Gruppe, die im Geschäftsjahr 2023/2024 (Stichtag 31. März 2024) mit 497 Mitarbeitenden einen Gesamtumsatz von rund 81 Millionen Euro erwirtschaftete.
