SAP KMC Connector

A Quick Start Guide for the use of
Mindbreeze InSpire.

MINDBREEZE®
ILLUMINATING INFORMATION

Preparation

1   SAP KMC Crawler User

We recommend that you create a separate user for the Mindbreeze services, for example "mindbreeze.crawler", on the SAP KMC server. However, you may also use an existing user. Should you choose to use an existing user, the following prerequisites must be fulfilled:

- The SAP KMC user must have access to SAP KMC via the WebDAV interface
- The SAP KMC user must have read permission of all content that is to be indexed
- The WebDAV server must accept the registration with Basic Authentication

....

2   Firewall Configuration

The SAP KMC WebDAV server port must be accessible by the Mindbreeze InSpire Server.

....

3   Configuration

The following information is needed for the basic configuration:

- SAP KMC server name and port
- WebDAV user data (user name and password)
- A list of the WebDAV folders to be indexed
